Fort Lauderdale, FL 33308

Dear Pat,

The Air Quality Division received the report concerning the interpretation of the Aberdeen Test Burn results. They have reviewed the calculations and data and concur with the ERB (Emergency Response Branch) that the burn was successful.

Vesta met or exceeded all test burn requirements including: the Destruction and Removal Efficiency, Particulate Removal, Hydrogen Chloride Removal, sampling requirements, continual operating parameters, and retention times. I appreciate your attitude and forbearance during the burn procedures. Your site preparation, waste material handling and trouble-shooting was instrumental for a smooth action.

Let me know if I can be of further assistance with this past action. I hope that we can work together in the future in order to ultimately destroy hazardous waste in Region IV.

Sincerely yours,

Norton E. Jessup (Red)
